Data Drain

By using a special skill called Data Drain, you will be able to rewrite the monster data, itemize data that has been drawn, and decrease levels of monsters. **This is an illegal action that is against user agreement with CC Corporation. Continuation of this action could lead to serious damage to your character. We will not be held responsible if irreversible damage is done to your character data.**

When the "PROTECT BREAK" mark is displayed during battle, open the Personal Menu by pressing the button and select Data Drain from the Skills Menu.

Viral Infection

Continued usage of Data Drain results in spread of the virus which is indicated by the color gauge. When spread of 100% is reached, a system error will occur and the game will be over. The spread can be decreased by defeating monsters without usage of Data Drain. Use Data Drain with caution.

Spread rate based on color:
 Blue (25%) > Green (50%) > Yellow (75%) >
 Orange (99%) > Red (100%)

Pros and Cons of Data Drain

Pros

- It is possible to obtain rare equipment items.
- You may obtain Virus Cores necessary for Gate Hacking.
- You will be able to weaken high level monsters and immortal monsters.

Cons

- Monster levels are low after Data Drain, so even if you defeat them, you won't gain many experience points.
- As the spread increases, there is a higher chance of going berserk, and when this occurs, there is a possibility that the game will end.

Gate Hacking

Areas known as "Protected Areas" can only be accessed through Gate Hacking.

Trespassing into them is possible by using Virus Cores. **This is an illegal action that is against the user agreement with CC Corporation. These actions could cause serious damage to your character data. We will not be held responsible if irreversible damage is done to your character data.**

The figure on the left shows the type and number of Virus Cores required to open the gate to the Area: Rotate the gate with the left and right directional buttons. Add or subtract Virus Cores with the up and down directional buttons.

The column on the right shows the list of Virus Cores you currently possess. Virus Cores that are missing will be highlighted in red. Once you have used a Virus Core, it will be subtracted from the list. A Protected Area opened by Gate Hacking will be accessible to all players.
